AUTHOR INDEX

VOLUME 40

ARMBRUSTER, Thomas and BERMANEC, Vladimir
Dispersion in Low Albite: High Accuracy Spindle Stage Measurements Between 480 and 632 nm, 21

BERGIN, Thomas F.
The Effect of Color on PLM Measurements, 227

BERMANEC, Vladimir, *see* Armbruster, Thomas

BESANCON, JAMES R.
An Automated Spindle Stage for Polarized Light Microscopes, 13

BRACKETT, Kim A; CLARK, Patrick J. and MILLETTE, James R.
Method for the Analysis of Asbestos Fibers in Water Using MCE Filters, 159

BRACKETT, Kim A; SEITZ, Susan D. and CLARK, Patrick J.
EPA Bibliography on Surface Contamination, 164

BRAUNER, Paul, *see* Gorski, Azriel

BROWN, Richard S., *see* Millette, James R., 131

BRYANT, W.M.D.
Optical Properties of Organic Crystals of Conjugated Unsaturated Structure, 153
Precision Measurements of Optic Axial Angles, 171
Research on a Shoestring, 255

CLARK, Patrick J., *see* Brackett, Kim A.

CRAVEN, B.J.
A Method for Detecting Cavitoma in Cotton Fiber Using Scanning Electron Microscopy, 243

CROCKER, D., *see* MacDonald, Hector S.

DELLY, JOHN G.
Diffraction Lines: The Microchemical Bench, Part I. Chemicals, 207
Diffraction Lines: Microscopes for Kids, 271

DERBY, J., *see* MacDonald, Hector, S.

FORD, Brian J.
Brownian Movement in Clarkia Pollen: A Reprise of the First Observations, 235

FÖRTSCH, Erich; UHR, Wolfgang and WONDRATSCHEK, Hans
A Novel Application of the Spindle Stage, 31

FRAYSIER, Harry D. and VAN HOVEN, Harvey
A Simple Mineralogical Soil Analysis Method Using Dispersion Staining, 40:2, 107

GOLOVIN, Alexander V., *see* Kisin, Mark V.

GORSKI, Azriel and BRAUNER, Paul
A Morphologic Abnormality Noted in Hair Roots of Patients of a Methadone Clinic in Israel (or The Burned Match Phenomenon), 40:2, 103

GUNTER, Mickey E.
Variation in Optical Class and Optical Orientation: The Rule, Not the Exception, 81

HORTOLÀ, Policarp
SEM Characterization of Blood Stains on Stone Tools, 40:2, 111

KISIN, Mark V. and GOLOVIN, Prof. Alexander V.
The Use of the SEM for the Investigation of Hairs Having Similar Structure, 259

LaRUE, Budd J.
Powell & Lealand's Dissecting Microscope, 251

MacDONALD, Hector S.; CROCKER, D. and DERBY, J.
Some Causes of Effervescence as Revealed by Confocal and Electron Microscopy, 125

McCRONE, Walter C., *see also* Moss, Robert, D.
Forensic Soil Examination, 40:1, 109
INTER/MICRO-92, 175
Microcrystal Tests and The Frye Rule, 193

McLAUGHLIN, Robert B.
Diatom Microscopy, 137, 199, 265

MILLETTE, James R., *see* Brackett, Kim A.; Smith, James J.

MILLETTE, James R. and BROWN, Richard S.
A Close Examination of the Surfaces of Asbestos Gasket Materials, 131

MOSS, Robert D. and McCRONE, Walter C.
Permanent Preparations with Cargille Liquids—Another Look, 123

RAPPE, Rodney G.
Microscopical Examination of Polymer Films, 40:2, 93

ROEDDER, Edwin
Optical Microscopy Identification of the Phases in Fluid Inclusions in Minerals, 59

SEITZ, Susan D., *see* Brackett, Kim A.

SMITH, Dorian G.W.
Computer-Assisted Mineral Identification Using Conventional Optical Observations, 39

SMITH, James J. and Millette, James R.
Calibration of the Rotation Angle Between TEM Brightfield Images and Electron Diffraction Patterns—A Response with New Data, 40:2, 115

STANLEY, Edward A.
Application of Palynology to Establish the Provenance and Travel History of Illicit Drugs, 149

SU, Shu-Chun
Calibration of Refractive Index Liquids By Using Optical Glass Standards and Dispersion Staining Technique, 40:1, 95

SUBJECT INDEX

VOLUME 40

Note: Due to a change in page format between issues 1 and 2, both issues include pagination from 93 through 122. To avoid ambiguity in the index the appropriate volume and issue number precedes these numbers.

50 Years Ago, 174
100 Years Ago, 20; 40:2, 114; 40:2, 122; 258
Absorption, As source of color, 227
AHERA Specifications, 159
Albite, 21
Algorithms for database searching, 41
Amosite, Permanent preparations in Cargille liquids, 123
Amylopectin, Starch, Ratio to amylose by PLM, 247
Amylose, Starch, Ratio to amylopectin by PLM, 247
Animal hairs, Pigment ultrastructure, 262
Annealing, Sanidine, 31
Apparent optical symmetry, 81
Archeological microscopy, Blood on stone tools, 40:2, 111
Artifacts seen in mineral inclusions, 75
Asbestos
  Accuracy of quantitative asbestos analysis, 178
  Collaborative study, volume estimates vs. point counting, 178
  Fibers in water, filtration method using MCE filters, 159
  Gasket surface wear of uncoated fibers, 131
ATR microspectroscopy, 188
Automated spindle stage, 13
Bacteria, Effect of ozone on (historical), 258
Banks, Sir Joseph, 235
Beale, Lionel S., 252
Becke line, vs. dispersion staining for n_D determination, 40:1, 97
Bellido, Prof. Don Ernesto Caballero, Diatom mounting method, 138
Behrens reagent box, 207
BDH spot test reagent set, 212
Bias in image interpretation, 38
Biaxially-oriented polypropylene, 40:2, 100
Bibliography on surface contamination, EPA, 164
Billings collection, 254
Birefringence
  Correlation with conjugated unsaturation, 153
  Mineral inclusions, 71
Blood stains on stone tools by SEM, 40:2, 111
Bloss, F. Donald, 1; 13
Blossomat, 14
Bookplates, microscopical, 184
Brown, Robert, 235
Brownian motion, see Brownian movement
Brownian movement
  Clarkia pollen, 235
  Demonstrated on Brown's apparatus, 181; 235
  Reprise of first observations, 235
Bubble formation mechanism by TEM and confocal microscopy, 125
Burned match phenomenon in hair roots, 40:2, 103
Calibration
  Refractive index liquids, 40:1, 95
  Rotation angle TEM image with ED patterns, 40:2, 115
Canada balsam, Substitute for (historical), 258
Carbon dioxide hydrate, 74
Carbonated beverages, Bubble formation in, 125
Cargille
  Chemical microscopy reagent sets, 210
  Liquids, permanent preparations, 123
Cautions in viewing objects, 38; 76
Cavitoma in cotton by SEM, 243
CBED for repeat distance and indexing of SAED pattern, 40:2, 117
Celluloid substitute for cover glasses (historical), 258
Chamot microchemical reagent set, 209
Chamot's reagent shelf list from Cornell Laboratory, 212
Chemical microscopy, microencapsulation methods, 191
Chrysotile
  Gasket surfaces shedding mechanism, 131

Permanent preparations in Cargille liquids, 123
Standard for TEM image/SAED pattern indexing, 40:2, 115
Coating removal by liquid nitrogen, 178
Cocaine
Geographical source of, 150
Pollen recovery for geographical sourcing of illicit, 150
Color
Effect on PLM measurements, 227
Mechanisms for generation, 227
Computer-assisted mineral identification, 39
Computer programs
EXCALIBR 13; 23; 84
EXCALIBR II, 23
OILCALIB, 40:1, 103
Computers
Algorithms for database searching, 41
Linked to automated spindle stage, 13
Mineral identification using, 39
Confocal microscopy, Effervescence by, 125
Conjugated unsaturated organic crystals, Analysis of optical properties, 153
Controlled substances, *see* Drugs
Corundum, 227
Cotton, Cavitoma by SEM, 243
Counting analysis, Soil characterization by, 40:1, 118
Coverglasses, Celluloid as substitute (historical), 258
Critical point, 64
Crocidolite
Effect of color on optical properties, 228
Permanent preparations in Cargille liquids, 123
Crossed axial plane dispersion, 154; 156
Crystal optics
Albite, dispersion by spindle stage, 21
By automated spindle stage, 13
Conjugated unsaturated organic crystals, 153
Polymers, 40:2, 93
Crystallography
Computer-assisted, 39
Conjugated unsaturated organic crystals, 153
Variations in optical class and orientation, 81
Darwin, Charles, 241
Database of optical properties of minerals, 39
Daughter minerals, 59
Dedication of volume 40, 1
Density
Common minerals, 40:1, 119
Separation on microscope slide, 40:1, 112
Diamonds, growth of synthetic, 180
Diatoms
Cistula lorenziana (Grunow) Cleve, 199
Diatom microscopy, 137; 199; 265
Diploneis spledida (Gregory) Cleve, 266
Epipsammic, 200
Harmonic analysis of valve outlines, 265
Mounting in air vs. denser medium (historical), 20
Mounting method of Bellido, 138
Numerical description of shape, 265
On sand grains, 200
Surirella fastuosa (Ehrenberg), 265
Strangulonema barbadense Greville, 137
Valve outline description using harmonics, 265
Diffraction lines
Microchemical bench, part 1, chemicals, 207
Microscopes for kids, 269
Dispersion
Albite, 21
As source of color, 229
Crossed axial plane in conjugated organic crystals, 154; 156
Effect of color on measurement of, 227
Optical indicatrix uncorrelated with unsaturation, 153
Variation, 81
Dispersion staining
Calibration of refractive index liquids, 40:1, 95
Effect of color on measurement, 227
Permanent preparations using Cargille liquids, 123
Soil minerals in forensic examination, 40:1, 109; 40:2, 107
Variability of colors of minerals, 40:1, 114
Vs. Becke line for n_D determination, 40:1, 97
Dissecting microscope, Powell & Lealand, 251
Dried blood stain morphology by SEM, 40:2, 111
Drug travel history and provenance using pollens, 149
Editorial
